

Salesperson Performance Analysis

Compare salespeople using sales, profit, growth, and average order value.

Metric	Result
Total Sales	■824,365.25
Total Profit	■42,480.78
Profit Margin	5.2%
Orders	4,936
Top Performer	Aditya Shah
Top Territory	Central

1. Methodology

The analysis combines Sales (30%), Profit (30%), year-over-year Growth (20%), and Average Order Value (20%). Each KPI is normalized to a 0–100 scale before weighting. Territory is retained as a comparison dimension so that raw revenue is not the only basis for judging performance.

2. Overall Ranking

Rank	Salesperson	Territory	Sales	Profit	Growth	AOV	Score
1	Aditya Shah	South	78,397	4,343	10.0%	169	87.9
2	Rohan Deshmukh	Central	72,492	4,053	-5.2%	169	61.3
3	Vikram Joshi	East	72,510	3,404	-8.2%	180	52.4
4	Meera Singh	Central	66,092	3,256	14.9%	179	50.8
5	Sneha More	East	64,445	3,807	1.9%	162	40.1
6	Aarav Sharma	West	69,275	3,838	-6.6%	155	38.7
7	Neha Pawar	South	69,264	3,275	-3.4%	169	37.7
8	Kunal Mehta	North	70,866	3,410	-8.1%	163	36.4
9	Ananya Patil	West	66,514	3,446	-5.5%	167	34.2
10	Priya Nair	North	68,077	3,313	-0.8%	158	29.5

3. Key Findings

- **Overall leader:** Aditya Shah ranks first with a weighted score of 87.9.
- **Highest growth:** Meera Singh has the strongest year-over-year sales growth at 14.9%.
- **Highest profit:** Aditya Shah generated the highest total profit at ■4,343.
- **Territory effect:** Central contributes the highest total sales; territory should therefore be considered in individual comparisons.

4. Performance Score

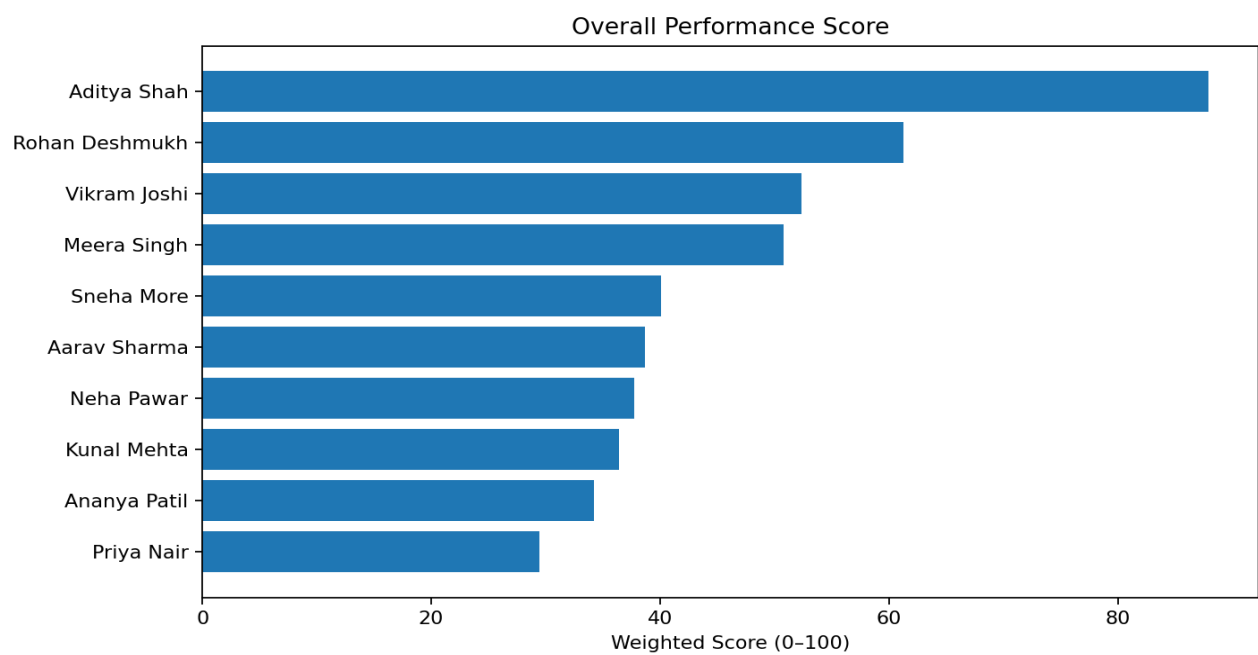

Figure 2. Weighted multi-KPI performance score.

A multi-KPI score avoids selecting the salesperson with the largest revenue only. A balanced performer can rank above a high-volume salesperson when profitability, growth and order value are stronger.

5. Territory Analysis

Territory	Sales	Profit	Margin	Growth	AOV
Central	204,198	10,503	5.1%	-0.4%	173
West	196,609	10,426	5.3%	-9.9%	162
South	147,661	7,617	5.2%	3.5%	169
North	138,942	6,723	4.8%	-4.6%	161
East	136,955	7,211	5.3%	-3.6%	171

7. Recommendations

- Use the weighted KPI score for performance reviews instead of revenue alone.
- Compare salespeople within the same territory before making compensation or coaching decisions.
- Coach high-sales/low-profit performers on discount control, product mix and margin.
- Study high-growth performers to identify repeatable sales practices.
- Track AOV alongside order count to distinguish volume-driven growth from value-driven growth.
- Refresh the Power BI dashboard monthly and monitor year-over-year growth by salesperson and territory.

8. Interview Questions & Answers

Q: Why is revenue alone insufficient?

A: Revenue measures volume but ignores profitability, growth quality and order value. A salesperson can have high sales but weak margins because of heavy discounts.

Q: How can territory affect comparison?

A: Territories can differ in market size, customer mix and opportunity. Raw sales may therefore favor larger territories. Comparing within territory and using multiple KPIs makes the evaluation fairer.

9. Tools Used

SQL for KPI queries and ranking logic; Excel for analysis and dashboarding; Power BI for interactive visualization; Python/Pandas for data preparation and validation.
